

SLA/TER PERFIN

DAVE HILL writes that in Sloper's first ledger the fullname perfin SLA/TER is listed against Slater and Bodega. Tomkins lists Fortes against F0010.01M and states that they replaced Slater and Bodega. From this start can anyone go back in history to find where the original Slater company was or any other information that will enable us to positively identify them with this fullname die? What postmarks do members have on their copies of S4380.01 and 02? Both are common Sloper alphabet so I would not expect to see them on stamps issued before about 1930.
